Chinmaya Forms Framework (CFF) is a system that allows for management of forms, accounts, and payment integration. With CFF, you can:

- Manage forms
- Create forms using [JSON Schema](#)
- Export responses
- Associate accounts with responses
- Integrate with PayPal and CCAvenue

CFF has been used for events such as:

- Walkathons
- Balavihar Registration
- Camp Registration
- Information Collection Forms
- Donation Forms

CHAPTER 1

Documentation structure

- **Form Management** - how to share forms and manage responses as a form admin.
- **Form Editing** - how to configure and edit forms by modifying the JSON options for a form.
- **Using the API** - information about integrating with the CFF REST API to use data in your own apps
- **Development on CFF** - information about development on the CFF codebase, contributing guidelines, and setup instructions

CHAPTER 2
